

PerfCap Corporation announces the transition of its headquarters to a new and larger facility at 76 Northeastern Boulevard, Nashua NH 03062.

PerfCap's legacy includes a core development team that came together as a unit of DEC/Compaq creating performance management and capacity planning tools similar to the present-day PAWZ & eCAP. PerfCap itself formed as an independent company in 2001, and continues to add new features and functions to the PAWZ and eCAP toolset. PerfCap has also introduced a related IT Asset Management product called FindIT.

The new facility will better enable PerfCap to continuously improve customer support and ongoing product development and test. The site also includes an improved training facility, and PerfCap looks forward to hosting visits of many new and existing customers.

PerfCap dedicates its new offices to continued passionate support of PAWZ and FindIT systems.
